## **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance:

With regard to claim 20, the prior art does not teach or suggest applicant's recited method of making and using a plastic rod for a storage battery hydrometer comprising the steps of providing a storage battery having an opening, providing a mold having an elongate, substantially cylindrical barrel-forming portion and an injection gate along the barrel-forming portion, providing a pocket in the mold adjacent the injection gate, injecting plastic into the mold through the injection gate and flowing the plastic into the pocket as injection of plastic into the mold is completed, thereby forming said rod into a substantially, cylindrical solid piece of material with an injection stress relieving formation formed from the plastic inserted into the pocket of the mold, and inserting said rod into said opening in said storage battery.

Robinson discloses molding of a hollow cylinder for use in a syringe with a stress relieving portion. However, Robinson fails to disclose applicant's recited method of making and using a plastic rod for a storage battery hydrometer comprising the steps of providing a storage battery having an opening, providing a mold having an elongate, substantially cylindrical barrel-forming portion and an injection gate along the barrel-forming portion, providing a pocket in the mold adjacent the injection gate, injecting plastic into the mold through the injection gate and flowing the plastic into the pocket as injection of plastic into the mold is completed, thereby forming said rod into a substantially, cylindrical solid piece of material with an injection stress relieving

formation formed from the plastic inserted into the pocket of the mold, and inserting said rod into said opening in said storage battery.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

## Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael C. Miggins whose telephone number is 571-272-1494. The examiner can normally be reached on 1:00-10:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Harold Y. Pyon can be reached on 571-272-1498. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
